[Download EZForecourtPlus 25b07R](#)

2: Install the **EZForecourt USB** package that can be downloaded from the EZTech. **Choose the full installation option.**

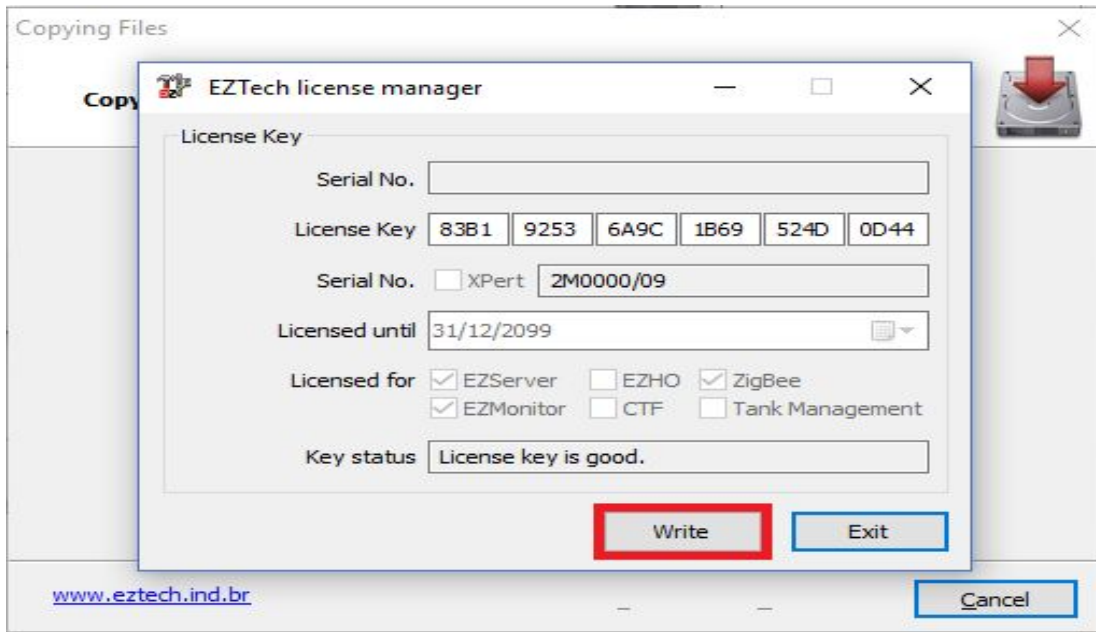

Installing the EZTech package

3: A message "Failed to Connect" will appear at the end of the installation for not having recognized a physical USB EZForecourt connected to your computer, ignore the message and move on.

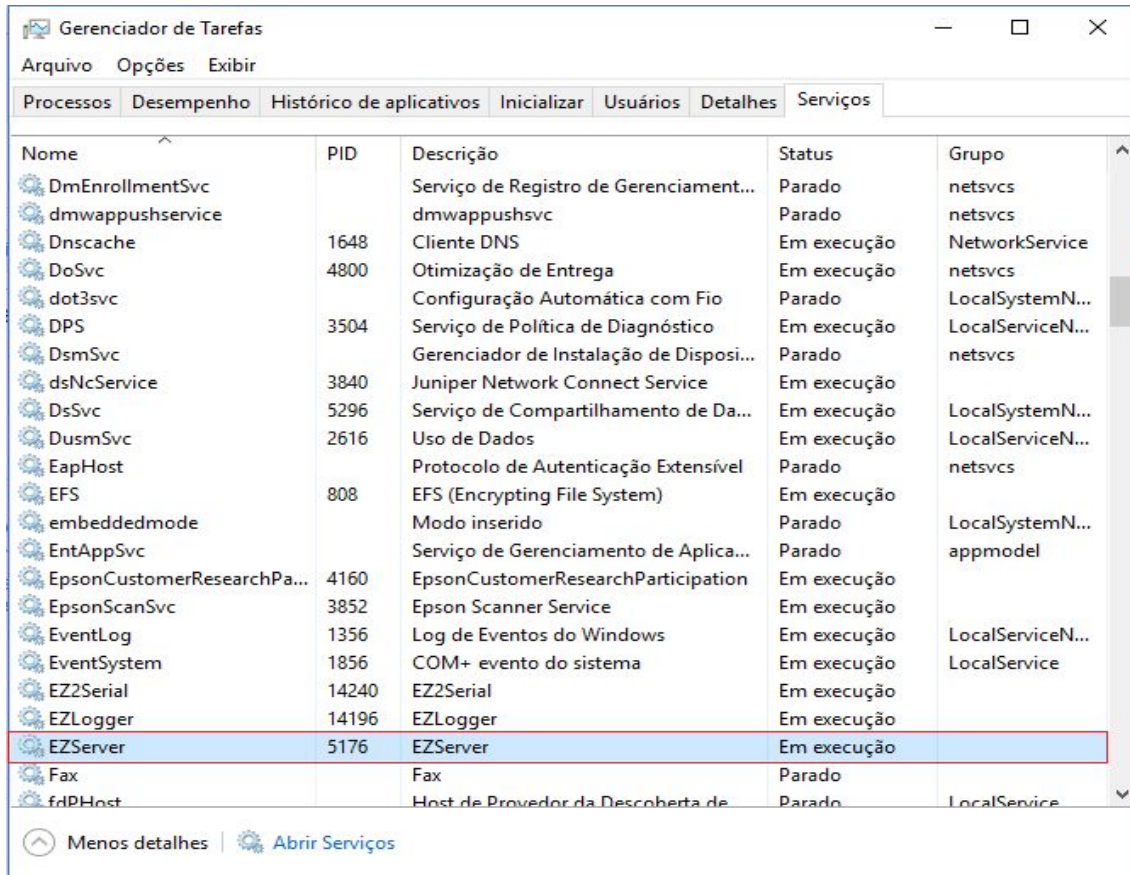

Failed to connect

4: A generic license key will be generated for the operation of the service. Click "Write" and then click "Exit".

License Key

5: The EZServer Service should now be running, check the Task Manager.

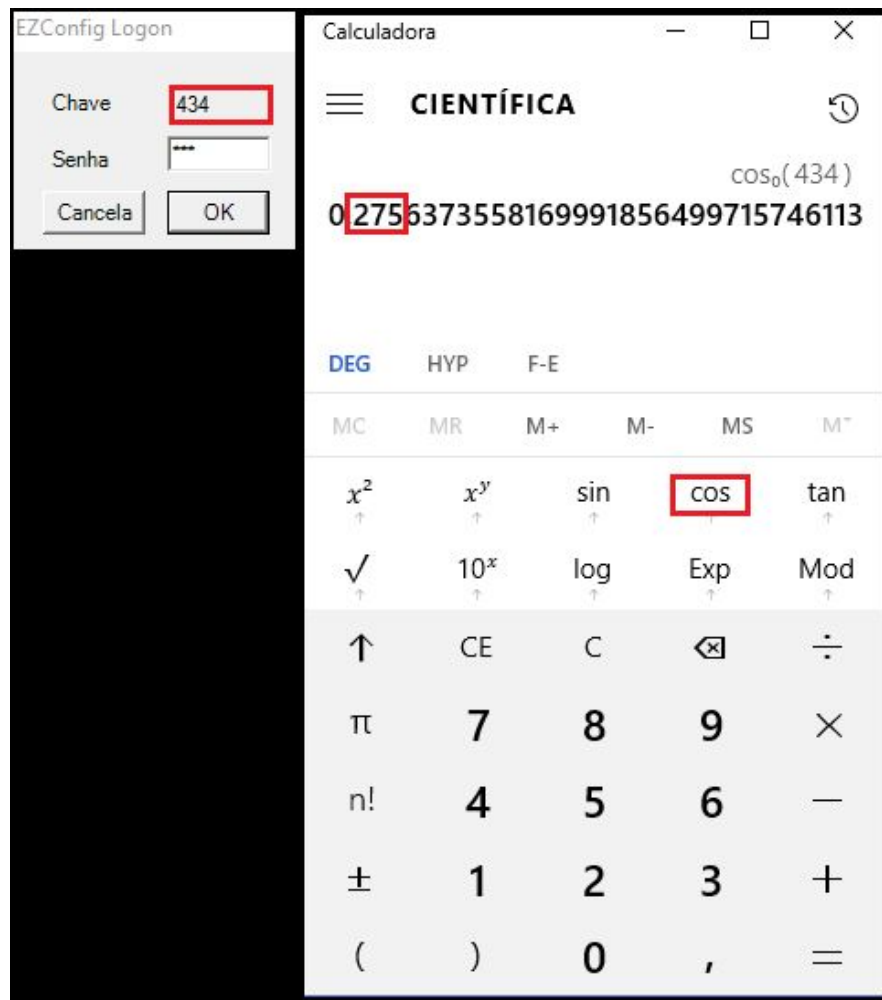

The screenshot shows the Windows Task Manager window with the 'Serviços' (Services) tab selected. The 'EZServer' service is highlighted in blue, indicating it is running. The table below represents the data visible in the Task Manager Services list.
